

JBE-2162

Remote indicator

The JBE-2162 is an remote indicator light compatible with addressable and conventional detectors that are installed in enclosed or concealed enclosures.

The remote indicator connects to a detector and is intended to be installed outside the room or enclosure where the detector is located.

The JBE-2162 is surface-mountable, incorporates pre-machined tube inlet and high-brightness LEDs.

Key Features

- Compatible with addressable or conventional detectors .
- Surface or recessed mounting.
- Pre machining for tube inlet.
- High luminosity LED.

TECHNICAL DATA

Working voltage	From 5 to 36V DC
Activation current	≤ 6mA (a36V DC) ≤ 1,4mA (a 5V DC)
Wiring	Twisted pair, max. wiring gauge 2.5 mm ²
Working temp	-10°C ~ 55°C
Environment	≤ 95% HR (40±2°C) (no condensation nor icing)
Dimensions	Ø 69 x 26 mm
IP Rating	IP40
Weight	0,04kg

Mechanical Dimensions (all dimensions in mm)
